Target version:			
Resolution:			

Description

For example if I want to reply privately at 1 comment that break netiquette etc).

The most important BTS offers this feature

History

What about adding a personal private ticket in issue history and sending appropriate mail notification?

#2 - 2011-10-05 11:57 - pasquale [:dedalus]

Isn't the better solution for me, because I don't want to write on history but only to send a mail: for example, if in my develop team anyone tell some "wrong" words (about the job, the specs, etc) and I want to notify the projects lead that isn't a member of the specific project in redmine...
