**Description**

I'm trying to use a plugin to import xml projects (from openproj, ms project) to redmine. the plugin is located in redmine/vendor/plugins, then i run the script to do the migration to db.. everything works fine but when it has to import task i have this message>

**Unable to import tasks: translation missing: es, activerecord, errors, messages, record\_invalid\_\_**

i think is something related to the language actually i use both spanish and english languages..

if someone can help to fix this?
