Description

When I Filter by Role, the filter selects assign_to - User with the system wide Role, rather than selecting those users who have the role in this project, as i would assume.

AFAIK only the two system roles have system wide effects. Though, this does seems not related to this issue as far as I understand the question...

Tobias, please provide some more info and/or a use-case description about this "defect". See submissions for some guidelines.

#3 - 2011-11-09 17:52 - Tobias as

the issues lies in
app/models/query.rb
method
sql_for_assigned_to_role_field
line 630
user_ids << role.members.collect(&:user_id)

somehow we have to collect those user_ids, that have this specific role/roles in the **specific** project, we are filtering in,
not those users that have the role in **any** project.

I hope you understand what I mean.
