Target version:	0.8			

Description

Avoid repetitive code snippets seen in many views:

```
<% content_for :header_tags do %>
<%= javascript_include_tag 'calendar/calendar' %>
<%= javascript_include_tag "calendar/lang/calendar-#{current_language}.js" %>
<%= javascript_include_tag 'calendar/calendar-setup' %>
<%= stylesheet_link_tag 'calendar' %>
<% end %>
```

Move that code to ApplicationHelper in call it implicitly when calling calendar_for('field_id').

Associated revisions

Revision 1315 - 2008-03-31 23:48 - Jean-Philippe Lang

Move repetitive calendar include code from views into helper (patch #966 by Peter Suschlik).

History

#1 - 2008-03-31 23:49 - Jean-Philippe Lang

- Status changed from New to Closed

- Target version set to 0.8

This patch cleaned the views indeed.
Committed in [r1315](#) with slight changes. Thanks.
