

Redmine - Defect #9679

Subversion: 404 on diff of renamed files

2011-11-28 15:04 - Etienne Massip

Status:	Closed	Start date:	2011-11-28
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	SCM	Estimated time:	0.00 hour
Target version:		Affected version:	1.2.2
Resolution:	Duplicate		
Description			
This can be turned into a Better handling of renamed item revision history FR but RM actually triggers a 404 where it should not: Looking at a renamed file revision history, e.g. /app/views/issues/show.html.erb which has been renamed with r7043 : <ul style="list-style-type: none">• if you try to get r7043 diff, you'll get an empty page (weird, but not an error)• if you try to get a diff between a revision > r7043 and any other revision you'll get a correct diff• if you try to get a diff between 2 revisions < r7043 you'll get a 404 FR idea: insert some "File has been renamed from <XX>" after r7043 line. The 404 is the bug.

History

#1 - 2013-03-24 20:16 - Filou Centrinov

I can not reproduce the problem. The following diff page of [r7043](#) is not empty: <http://www.redmine.org/projects/redmine/repository/revisions/7043/diff/>

#2 - 2013-03-25 20:12 - Etienne Massip

I can totally reproduce. Just go to the history page, select both 7043 and previous revision 6732 and click on button at the bottom of the page.

And diff between 2 older revisions gives an understandable 404.

#3 - 2013-03-25 21:24 - Filou Centrinov

I see. [Revision 7241:6372](#) and [Revision 7241:6326](#) are working, but [Revision 6372:6326](#) shows an error 404.

Exactly. And [Revision 7043:6372](#) is empty.
