Description <p>Adding a group to multiple projects in the administration is a multi click/page process and is only done per project. I'd like to see this screen to be able to easily add a group/role to multiple projects (or all) at the same time.</p> <p>This could be a separate section in the Group administration that lists all the projects on the left with checkboxes (check all/uncheck all) and to the right the user can choose what role.. This would allow someone to add a group to multiple project under a certain role.</p> <p>We have 100 projects and to make updates to all projects like adding a new group is not very efficient.</p>	
Related issues: <p>Is duplicate of Redmine - Feature #11702: Add user/group to multiple projects... Closed</p>
