

Redmine - Feature #9975

Displaying a Gantt chart by default not from the current month but from the previous month.

Description			
<p>Displaying a Gantt chart by default not from the current month but from the previous month.</p> <p>We are a company trying to adapt redmine for our purposes. And we have some small suggestions for improvements. We are ready to pay for these improvements. How does it do better?</p> <p>For example, we need a patch for this feature.</p> <p>ps: (in Russia) Мы из России было бы удобнее работать с русскоязычным разработчиком.</p>
